

Zenith One

The Zenith One packs flagship performance into a slim design. It features the Snapdragon X3 chip, 12GB of RAM, and 256GB of storage. Its 6.7-inch OLED display with 120Hz refresh rate delivers smooth visuals, while the triple camera system excels in low-light photography.

AeroPhone Lite

AeroPhone Lite is designed for budget-conscious users who don't want to compromise on quality. With a MediaTek Helio G95 processor, 6GB RAM, and 128GB storage, it offers snappy performance for everyday tasks. Its 5000mAh battery ensures two full days of usage.

Photon X Ultra

Photon X Ultra is built for mobile photographers and power users. It sports a quad-lens 108MP camera setup, 16GB of RAM, and a blazing-fast Snapdragon Pro chip. Its curved AMOLED display and 120W fast charging make it a premium powerhouse.

Nimbus Mini

Nimbus Mini is a compact 5.8-inch smartphone that fits comfortably in one hand without sacrificing features. It has the A14 Fusion chip, 8GB RAM, and 256GB storage. Ideal for users who prefer smaller phones with high performance.

Titan Max 5G

Titan Max 5G is a rugged smartphone built for extreme conditions. With a reinforced titanium frame, IP69 water resistance, and a massive 8000mAh battery, it's perfect for outdoor enthusiasts. It supports 5G, has 12GB RAM, and 512GB expandable storage.
